

The Town of Shawangunk is looking to find additional people to serve on the Town's Climate Smart Committee. The Committee focuses on initiatives that promote energy savings, reduce waste through recycling, composting etc., promoting the reuse of items that can be fixed, increasing the use of renewable energy, and reducing the risk of floods and fires. These are just some of the areas the committee investigates. With each documented step, the Town earns points which can be recognized with monetary rewards for the Town.
